## WORK EXPERIENCE

---

Java/Kotlin Software Engineer

Tinkoff Bank

📅 Oct 2023 – Aug 2024

📍 Moscow

- Designed and maintained Spring based REST API services for different debt collection processes.
  - Implemented complex business logic responsible for making decisions on clients via ODM-like framework (Kotlin DSL).
  - Optimised development and deployment workflows in our team via Gitlab CI/CD.
  - Wrote unit tests increasing test coverage of services by 10%.
  - Searched data for regression tests using SQL.
  - Tightly communicated with customers and analysts to maintain domain driven architecture in application development.
- 

Java Software Developer

Computer Information Technologies

📅 Nov 2022 – Oct 2023

📍 Saint-Petersburg

- Designed and maintained Spring based modules of business process management system.
- Created the integration of our service with the Telegram messenger for sending notifications, reports and statistics, which was required by 30% of users.
- Developed various application features aimed at improving existing processes.
